

Providence Hospital

By choosing to participate in a PCMH, I agree to:

- Make sure my child's doctor knows his or her entire medical history.
- Tell my child's doctor all of the medications he or she is taking
- Actively participate with my child's doctor in planning his or her personal action plan.
- keep my child's appointments as scheduled.
- Adhere to the action plan

designed by my child's doctor.

- Consult my child's doctor before making an appointment with a specialist.
- Know my child's insurance and what it covers.
- Provide the office feedback on how they can improve.

Welcome to your medical home

A Medical home is a team approach to providing total health care. Your medical home will include your health care provider, others who support you, and most importantly-you.

How will my child benefit as a patient?

- Access to a doctor who uses latest technology and is better connected with the medical community and manages care more efficiently.
- More focused, personal interaction with doctors and care teams.

What can I expect for my child?

- Single point of comprehensive care.
- Your doctor will work closely with the specialists and other care team.
- You will share in making decisions regarding your child's care.

How will the office visit change?

- You and your child will be educated with tools that explain the concept of PCMH.
- Medication review and management provided at every visit.
- Develop personal action plan and goal setting to ensure all guidelines are followed.
- We will ask how we can improve your child's health.

All patient information will continue to remain confidential.

You will have access to a doctor on call 24 hours a day, 7 days a week.
